Steel Container Ramps with Side Rails 60 In. x 60 In. 20000 Lb. Capacity Brow

MODEL CRS-6060-20

Loading Dock Equipment / Steel Container Ramps with Side Rails

PRODUCT OVERVIEW

A CRS container ramp is the perfect asset for loading and unloading products over uneven surfaces. The steel construction is long lasting and durable throughout harsh working conditions and inclement weather. During those adverse atmospheres the raised tread plate platform surface enables the user to have sure footing and minimize worker injury during use. The beveled edges on both ends allow smooth entry/exit by limiting the surface of height difference during transition. Side curbs also play a large role in the user safety by helping to maintain a safe alignment of goods as they pass from one area to another. A range of large capacity designs are available to best suit your specific needs.

KEY FEATURES

- Side barriers for clear ramp safety
- Compact for storage
- Robust construction for longer term use
- Easy access to a variety of settings

CORE PRODUCT DATA

ASSEMBLED WEIGHT	ASSEMBLED SIZE	SHIP WEIGHT
567 lbs	60" W x 59.9375" L x 9.5625" H	700 lbs

PACKAGE 1 SIZE	COLOR / FINISH	FREIGHT TYPE
60" W x 60" D x 19" H	Brown	LTL Palletized
