Factory Installed Voltage Change 208/230 Volt Single Phase For Stretch Wrap Machine Units

MODEL SWA-VCC-208/230-1

Packaging Equipment / Powered Stretch Wrap Machines

Product image unavailable

PRODUCT OVERVIEW

The voltage upgrade is a great addition for the powered stretch wrap machines. The upgrade option allows the user to have a more constant power supply throughout daily use. The upgrade also lets the user have preference to the type of power source that personnel is capable of achieving.

KEY FEATURES

- Voltage change to single phase, 208/230 VOLT to promote sustainability
- Allows the unit to be powered more efficiently
- Helps minimize packaging times
- Permits the unit to rotate to precise positions
